

**3. The ages of each individual (either individually, or in age brackets) who in 2013 and 2014 experienced a stun-gun (1) being drawn, (2) aimed, (3) arced, (4) used to red dot them, (5) used to angle drive stun then, (6) used to drive stun them, and (7) fired at them.**

## **Modes of Use**

When an officer considers there to be a imminent use or threat of violence they can consider one of the following uses of Taser:

- **Drawn:** Removed from holster.
- **Aimed:** Pointed at subject.
- **Red Dot:** Pointed at subject with red dot laser sight active so that red dot appears on subject.
- **Arced:** No cartridge attached. Taser switched on and trigger squeezed in order that electric current arcs between contacts on front of Taser.
- **Fired:** Cartridge attached. Taser switched on and trigger squeezed causing cartridge to fire.
- **Drive Stun:** No cartridge attached. Front of Taser placed against subject and arced.
- **Angled drive stun:** Cartridge on. After an ineffective firing (barb placements too close together or failure of one barb to attach) , front of Taser placed on subject away from the barbs and Taser activated.

One officer carrying out any of these will constitute a Taser 'deployment'. Two officers carrying out any of these on the same subject will count as two 'deployments' but one subject. For example one officer may draw the taser, and another Aims the taser on the same subject. Two deployments, One subject.

Information below includes statistics where subjects have more than 1 Taser deployment used against them.

2014
